

Food Grade Strut®

Sanitary mounting systems for food processing facilities

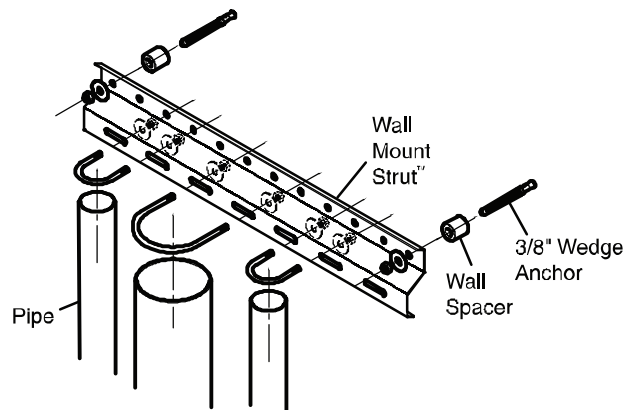

Are you still using traditional strut or fabricating custom brackets for sanitary pipe/conduit mounting applications?

Food Grade Strut® has the solution for your sanitary pipe/conduit mounting needs.

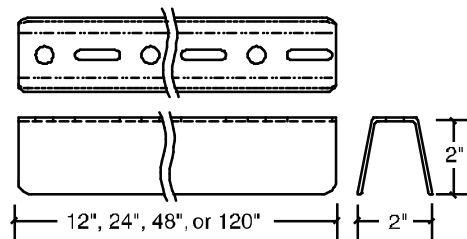

Wall Mount Strut®

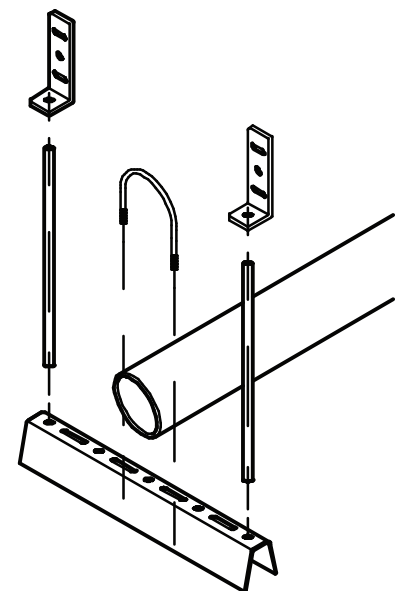

Wall Mount Strut® is made of heavy-duty 12 ga. 304/316 stainless steel and is available in precut lengths of: 12", 24" 48" and 120".

Trapeze Mount Strut®

Trapeze Mount Strut® is made of heavy-duty 12 ga. 304/316 stainless steel and is available in precut lengths of: 12", 24" 48" and 120".

Food Grade Strut® Accessories

PATENTED

U-Bolts:

Food Grade Strut(R) U-bolts are fabricated to accommodate trade sizes of conduit and tubing. Each U-bolt has minimum thread to ease assembly and minimize exposed threads.

Please refer to the U-bolt Selection Chart.

All U-bolts are pre-lubricated with food grade anti-seize, and include necessary mounting hardware.

U-Bolt Selection Chart

Wall Mount Strut® Accessories

Wall Spacers:

Wall spacers are made of solid 304/316 stainless steel and must be used between each piece of Wall Mount Strut™ and walls. Use TWO for 1' to 5' long strut pieces, use THREE for strut pieces longer than 5'.

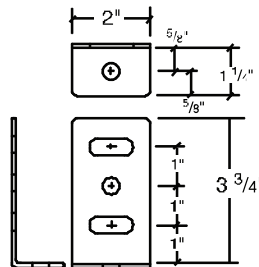

Trapeze Mount Strut® Accessories

L-Brackets:

L-Brackets are used for mounting Hanger Rods to the ceiling or other overhead structures. Made of 304/316 stainless steel.

Design load = 500 # force downward
Attach to supporting member using fasteners that provide a collective working shear strength of 1,500 lbs. or more.

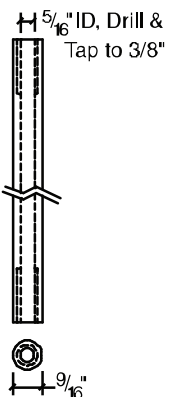

Hanger Rods:

304/316 Stainless steel Hanger Rods are available in 1 meter (est. 39-3/8") long or 2 meters (est. 78-3/4") long. Each rod is internally threaded for sanitary design and ease of installation.

Working tension for Hanger Rods is 1,150#.

Attach Hanger Rod to L-Bracket and Strut with 3/8" NC x 1" 304 stainless steel bolts possessing a proof strength of 15,000 psi or more.
